EDENDATA

Kindbody Case Study

Kindbody is a wellness and fertility healthcare provider for women, offering modern, tech-enabled clinics across the country. Due to rapid growth and a quickly evolving international strategy. Kindbody was looking for professionals to advise on their security strategy through these transitions.

Eden Data Helped by:

- Taking over as executive leaders for their entire security & compliance practice, serving as their Chief Information Security Officer (CISO)

- Managed successful HIPAA & SOC2 audits

- Building strategy for additional certifications to expand market reach

- Helped with investor confidence contributing to Kindbody securing series C funding

Kindbody impact:

- Supported their expansion ability into global markets through compliance adherence with our successful audit projects

- Helped secure the largest fertility investment ($62mil) in history
